Although women make up nearly 50% of the American workforce, they only hold 25% of the jobs in the STEM fields.

SPEED SCHOOL'S GOAL IS TO CHANGE THESE STATISTICS.

Join us for a full day of sessions designed to engage girls in STEM content through hands-on experiences and access to womens in engineering. Parents and guardians learn about U of L's JB Speed School of Engineering, as well as participate in some STEM activities themselves.

Register beginning **March 2** at louisville.edu/speed/outreach/STEMsummit
