

Remediation Plan

School: Children's Academy of New Albany

At Children's Academy of New Albany, a total number of 68 fixtures were tested. One fixture did present lead levels that exceed the EPA's action level. The action level of 15 ppb is not a measure of health effects. It serves as a signal to the facility to take steps to reduce lead in the water.

We have taken one or more of the following actions to address this situation:

- Shut off the water to these fixtures;
- Installed signs where applicable indicating these fixtures are for hand-washing only;
- Replaced the fixtures.
